FOR IMMEDIATE RELEASE

**VIKING INTERWORKS™ TARGETS HIGH-DENSITY MARKET
WITH 8GB DDR2 VLP DIMMS**

RANCHO SANTA MARGARITA, Calif. – April 30, 2007 – Viking InterWorks™, Inc., a Sanmina-SCI Company (Nasdaq NM: SANM) and designer and manufacturer of memory modules, today announced it is offering a full line of DDR2 VLP 240-pin Registered DIMMs. With a height of 0.72” (18.3mm) and speeds up to 667MHz, these VLP DIMMs will be available in densities of 512MB, 1GB, 2GB, 4GB and an industry-leading 8GB.

The RoHS-compliant 8GB modules have been designed to use 1GB DDR2 DRAM stacked 4 high utilizing Viking InterWorks’ propriety RAM-Stack™ chip stacking technology. The main advantages of the RAM-Stack product compared to other stacking techniques are its superior thermal performance, excellent signal integrity at high speed and reliability at higher temperatures.

“These RoHS-compliant 8GB 4 Rank DDR2 VLP DIMMs are aimed primarily at the high-density server market. We have also released a line of RAM-Stack based Mini RDIMMs for the communications market,” said Adrian Proctor, Vice President of Marketing for Viking InterWorks.” The advantages of RAM-Stack are very exciting and Viking InterWorks is able to provide OEMs with reliable, thermally superior high-density modules.”

This innovative approach to stacking memory components places DRAM die on a ceramic substrate with carefully controlled thermal coefficient of expansion, resulting in a cost effective and highly reliable method of stacking. These DDR2 4GB RAM-Stack devices are an extension of previously released and highly successful DDR1 range.

Viking InterWorks continues to advance its technology leadership role by proactively developing products required for the server, telecommunications and embedded markets. For more information on all other DRAM, Flash, DSP and processor module products, please visit www.vikinginterworks.com.

About Viking InterWorks

Headquartered in Rancho Santa Margarita, California, Viking InterWorks is focused on delivering innovative, high-quality memory and communications modules to the server, telecommunications and embedded markets. Founded in 1989, Viking InterWorks has been providing Original Equipment Manufacturers (OEMs) with industry leading design, engineering, product support and customer service for more than 18 years. For more information, visit www.vikinginterworks.com.

About Sanmina-SCI

Sanmina-SCI Corporation is a leading electronics contract manufacturer serving the fastest-growing segments of the global Electronics Manufacturing Services (EMS) market. Recognized as a technology leader, Sanmina-SCI provides end-to-end manufacturing solutions, delivering unsurpassed quality and support to OEMs primarily in the communications, defense and aerospace, industrial and medical instrumentation, multimedia and consumer, computer and server, and automotive technology sectors. Sanmina-SCI has facilities strategically located in key regions throughout the world. More information regarding the Company is available at www.sanmina-sci.com.

Sanmina-SCI Safe Harbor Statement

The foregoing, including the discussion regarding the Company's future prospects, contains certain forward-looking statements that involve risks and uncertainties, including uncertainties associated with economic conditions in the electronics industry, particularly in the principal industry sectors served by the Company, changes in customer requirements and in the volume of sales to principal customers, the ability of Sanmina-SCI to effectively assimilate acquired businesses and achieve the anticipated benefits of its acquisitions, and competition and technological change. The Company's actual results of operations may differ significantly from those contemplated by such forward-looking statements as a result of these and other factors, including factors set forth in the Company's fiscal year 2006 Annual Report on Form 10-K filed on January 3, 2007 and the other reports, including quarterly reports on Form 10-Q and current reports on Form 8-K, that the Company files with the Securities Exchange Commission.
